Regional Industry Networking Conference in Singapore

Regional Industry Networking Conference (RINC 2011) at Singapore Polytechnic University would address the issue of automation technology adoption and development of integration skills. The conference discussed the smart way to apply them for changing business needs. Participants were provided with an opportunity of re-designing business processes and re-shaping technology capability through automation technology review. By sharing relevant knowledge and information with conference speakers, participants are able to understand how to stand for better business results and global competitiveness through improved productivity, which is enabled by automation.

The PROFIBUS Association Southeast Asia was invited to give a speech on Market Trends and new technologies like PROFINET in manufacturing Industries.

Simplified Wireless Communication

PROFIBUS & PROFINET International (PI), Fieldbus Foundation (FF) and HART Communication Foundation (HCF) are currently working intensively on the development of an architecture for a WirelessHART gateway. The background to this is that although the process industry appreciates the benefits of wireless communication it is still not making sufficient use of it. WirelessHART uses a mesh network, i.e. each device can generate or receive signals (sensors/actuators) and pass them on to surrounding devices (repeater function). According to users the greatest obstacle when implementing wireless systems is the complicated integration of WirelessHART mesh networks into the existing automation environment.

Updated version of the PROFINET System Description is available now!

The English and German issues of the PROFINET system description have been updated by the PROFINET marketing working group and are available now.

The concentrated presentation of the fundamentals in the PROFINET system description provides the reader with a quick overview of the full scope of functions, from network installation and scalable communication to web-based diagnostics. Following an initial overview, a host of topics that make PROFINET a universal and comprehensive Ethernet-based automation technology, which can be used by the entire industrial automation field, are discussed.

You can download the documents as pdf-file on the PI website for free.
